19	overall is good
20	Even though its last-minute changes in the lecturer, the current lecturers did some great job. Students have an idea of what should be taken from the course, not confusing. To be honest, its quite hard to catch up but thanks to the lecturers, we had not much issue.
21	I personally really love Dr. Ray's teaching methods since before this. I have been always looking forward to his class every week. I really love how he explaining all the theories and calculations so details and make it easier for us to understand the topic. Still couldn't believe that we manage to cover all the LU but Dr. Ray and Dr. Azra have helped us a lot in catching up on the syllabus and make it really easy for all of us. Thank you, Dr. Ray.
